

# THE 6<sup>th</sup> WORLD ENERGY STORAGE CONFERENCE

9 - 12 August 2026  
İSTANBUL ATLAS UNIVERSITY  
İstanbul, Türkiye

It is our great pleasure to make an open invitation to The 6<sup>th</sup> World Energy Storage Conference (WESC-2026). WESC-2026 will be held between 9- 12 August 2026 in İstanbul Atlas University, İstanbul, Türkiye. The 6th World Energy Storage Conference (WESC-2026) is an international scientific platform dedicated to advancing fundamental and applied research in energy storage technologies, energy systems engineering, thermodynamics, materials science, and data-driven optimization for sustainable energy solutions. The conference convenes scientists, engineers, policymakers, and industry stakeholders to address fundamental and applied challenges in the development, optimization, and deployment of energy storage systems within modern energy infrastructures. In addition, the conference integrates artificial intelligence and machine learning approaches for performance prediction, materials discovery, degradation diagnostics, digital twins, real-time optimization, smart grid integration, and data-driven control of hybrid and distributed energy storage systems. By combining thermodynamic theory, advanced computational methods, and policy considerations, WESC aims to support the development of efficient, resilient, and sustainable energy storage solutions that underpin the global energy transition.
